

# #105 AMIX Courtroom & Level Control

General Layout [08/22/00]

## Application

This solution provides:

- Threshold sensitive gate on/off of individual channels and Number of Open Microphones (NOM) attenuation to maintain feedback stability
- Remote volume control of all channels and the master output with the use of the 8/1 mini-mixer
- Post fade mono feed for recording

This solution does not have the ability to provide separate mixes for the 4-track recorder
