

intelix House of Worship Solutions

Audio/Video distribution throughout your house of worship

How do you integrate your older analog satellite boxes, cable receivers, DVD players, VCRs, and computers with your new HD television?
Magic? Miracle? Intelix.

The Intelix DIGI-SCAL-11X2 features the processing of three different devices—switching, scaling, and format conversion in a single device. It provides switching between eleven different audio-visual sources, scales the sources up to 720p or 1080p, and converts the signals to HDMI for seamless integration with your HD network.

Intelix offers the broadest line of audio/video over twisted pair extenders in the professional AV marketplace, including solutions for multiple formats of audio and video, VGA, DVI, HDMI, and USB. Intelix technology helps you manage your audio-visual signals—whether splitting, switching, converting, or extending—and ensures professional-grade performance from source to destination.

Design with Intelix and Design with Intelligence.

DIGI-HD-IR2

1080p up to 150' via Cat 6 (100' Cat 5e)
720p/1080i up to 300' via Cat 6 (200' Cat 5e)
built-in ESD surge protection
linkable for extended distances
HDMI & IR over two twisted pair cables
HDshāk inside

DIGI-HD-UHR2

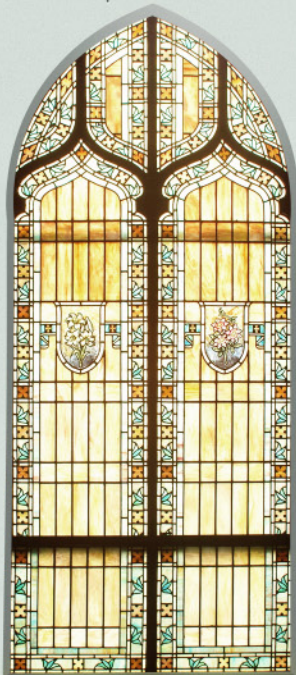

HDMI over a single twisted pair cable
1080p up to 150' via Cat 6 (100' Cat 5e)
720p/1080i up to 300' via Cat 6 (200' Cat 5e)
built-in ESD surge protection
linkable for extended distances
HDshāk inside

DIGI-HD-8X8

8 HDMI inputs
8 HDMI outputs & 8 twisted pair outputs
HDMI 1.3 & HDCP compliant
front panel, Ethernet, RS232 & IR control
built-in IR switching
built-in front panel touchscreen

intelix House of Worship Solutions

Audio/Video distribution throughout your house of worship

The Intelix 8002MCB-PHNX-3 mic/line mixer

is a solid solution for applications where space is tight and extremely high quality performance is required at a very reasonable price.

The 8002MCB-PHNX-3 features:

- phoenix-style terminal strip connectors.
- 8-channel, dual bus mic/line mixing. Recessed selector switches allow bussing of input signals to the main, AUX, or both outputs.
- Dual function LED VU meter. The multi-colored LED may be internally jumpered to meter either the main or AUX bus.
- Studio quality compression and limiting. The front panel compressor/limiter threshold is adjustable from -40 dB to +20 dB.
- Actively balanced inputs and outputs. Each input has a -50 dB mic/line pad and low cut filter. Units also include a versatile 9th AUX input and mic/line pass on the main output.

The Intelix Audisey Athena

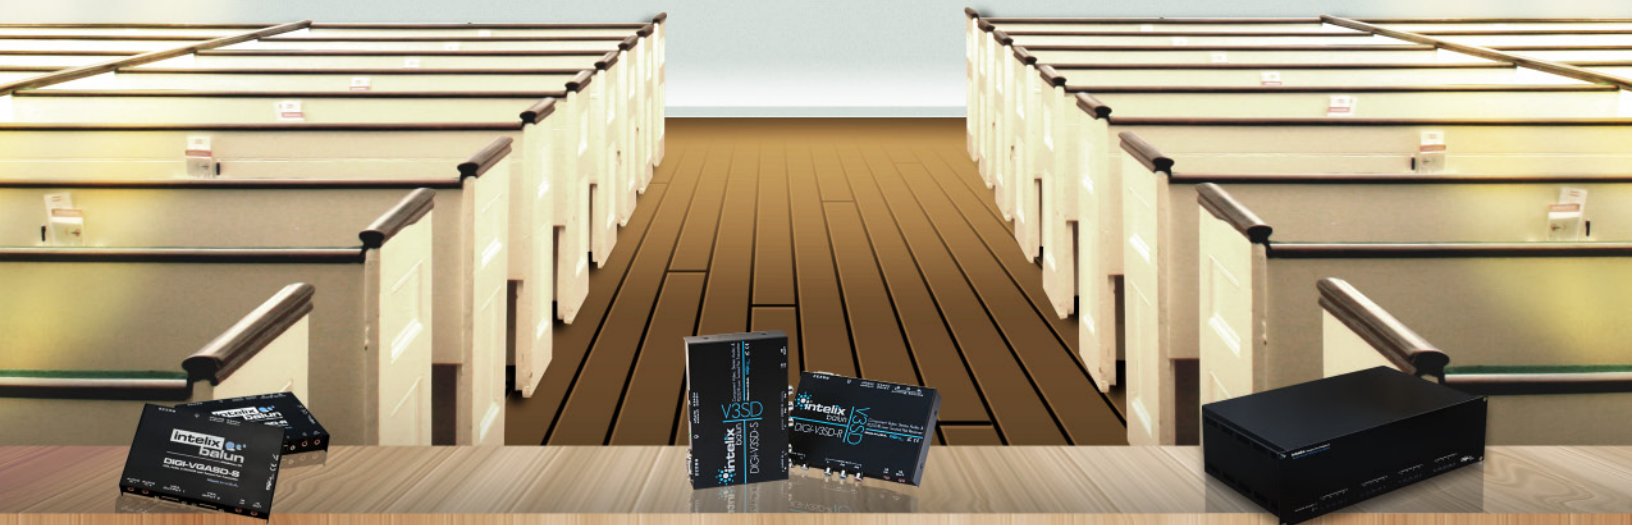

Why install and program multiple boxes?

The Audisey Athena is a complete audio distribution system in a box, making it ideal for a myriad of applications:

-restaurants
-whole house audio

-shopping facilities
-houses of worship

-recreation centers
-dentist offices

DIGI-VGASD

1600x1200 video up to 350'
local monitor output
hi-fidelity, 20 Hz to 10kHz stereo audio
bi-directional RS232 and IR extension
sturdy metal housing

DIGI-V3SD

stereo audio, video & control up to 1,000'
480i, 480p, 720p & 1080i component video
hi-fidelity, 20 Hz to 20 kHz audio
bi-directional RS232 and IR extension
bi-directional RS232 and IR extension
individual channel color skew correction

DIGI-VGASD-16X16

16 analog audio & video inputs
16 twisted pair extender outputs
switch any input to any output
compatible with third-party control systems
audio, video & control extension up to 1,000' over a single twisted pair cable
